Bombay Exhibition Centre, Mumbai, INDIA

Supported by:

Co-located with:

Annapoorna

# "India" - Land of Business Opportunities

Population : Over 1.30 billion

GDP : Over US \$ 2.80 trillion

GDP Growth : ~7%

## INDIA - The Land of YOUNG People

India - Land of young generation contributes more than 65 percent of the population under age group of 35, which creates higher potential growth prospects for food & drink industry. Due to fast moving urbanization, changing preference in the food habits, growing disposable income and nuclear families, the Indian food market have witnessed rapid growth on the back of positive developments and investments. The size of the Indian middle class estimated to be over 300 million is at the heart of India's economic development which is leading to demand for convenience food and increasing expenditure on health & nutritional foods which offers enormous opportunities for both domestic and international players.

The new India goal is to be a US \$ 5 trillion economy by 2024-25 with special focus by the Government on the Food Processing Sector which contributes 14% of manufacturing Gross Domestic Product (GDP). Govt. of India has taken various initiatives through its food safety regulator - FSSAI to improve the quality of food products being offered to citizens of the country. Growing at a CAGR of 14.6% the Food Processing Industry is expected to reach US \$ 543 billion by 2020. The Government is also promoting India as an investment destination by allowing 100% FDI under the automatic route in food processing industries, trading, e-commerce in respect of food products manufactured or produced in India.

## Food Ingredients – The Next Growth Wave:

- Rapid shift to urbanization, growing population and evolving consumer tastes is providing opportunity to the Ingredients sector
- Changing life style, increasing health consciousness, different age groups has given the FI industry major boost
- The Indian Food Ingredient industry riding on the promising prospects of the food processing sector
- The Food Ingredient sector is growing with increasing preference for processed foods & rising preference for ready-to-eat meals
- With regulations through Food Safety & Standards Act, Indian Food Ingredient is evolving as per International norms
- With impressive food manufacturing base, India is yet to untap the market potential of Ingredient sector
- With increased focus on R &D would allow the FI sector to comprehend and evolve innovative, quality flavours and fragrances rapidly in line with consumer taste
- Rapid shift of Indians towards organic food
