## THE platform for sustainable growth...

**P**ackEx India, with growing exhibitor & visitor numbers year on year, has established itself as the most important platform for packaging materials, machinery suppliers & packaging users. Its ability to attract key decision makers from across India and the neighbouring countries, has been the key growth factor for success of this exhibition.

In the current market scenario, where new product launches needs innovative packaging solutions, emphasis on packaging has gone to a new level. As a networking platform, PackEx India is playing an important role to understand, analyse and adopt these latest packaging trends.

GDP Growth : ~ 7%

## Indian Packaging Industry at a glance

- Packaging is the fifth largest sector in India's economy
- One of the highest growth sectors in the country growing at around 22% per annum
- The packaging industry in India is anticipated to reach \$73.6bn by 2020 majorly driven by growing population, income levels and changing lifestyles
- Latest trends show promising growth in - consumer packaged goods, organized retail, metal packaging, usage of tetrapaks, temper evident packaging, shrink & stretch packaging, recyclable packaging, aseptic packaging and many others
- Government targets to abolish single-use plastic by 2022, which in turn will increase 'eco-friendly packaging'
